

Design Technology Learning Journey

Working with materials and developing skills for life beyond school
Supporting a life-long love of creativity

Intent: At CRS, the subject of Design Technology allows us to discover the properties of different materials, explore designs for aesthetics or functional creations and develop life skills to support our independence.
Implementation: In Design Technology, we implement our curriculum through a variety of creative teaching approaches and tasks. We provide our students with an opportunity to design and make products that solve real and relevant problems within a variety of live contexts.
Impact: We know our DT curriculum is working through the engagement of students throughout the school, both observed and recorded in student voice. We ensure that students are acquiring skills and knowledge through the CREATE 'I Can' skills progression document and Go4schools.

Every Child, Every Chance, Every Day
